

## Position Sheet - Streaming & Technical Support Volunteer

### Context:

The [United World Week](#) (UWW) is a global festival of actions, ideas, and initiatives for unity that takes place every May. Thousands of young people, communities, and organizations worldwide organize events to highlight solutions to today's challenges and to showcase what a united world looks like in practice.

One of its most iconic moments is Run4Unity, a relay race for peace and fraternity that connects people across time zones and continents. Through sports, dialogue, and concrete actions, participants demonstrate that a world of peace and solidarity is not just a dream, but already a living reality.

As a volunteer, you will be at the heart of this international mobilization, helping to shape and amplify a movement that crosses borders and inspires thousands.

### Duration & Commitment

- February – May 2026, with the most intense period between April and May 2026.
- Approx. 4 hours of work per month + 2 hours of online meetings via Zoom.
- On-site presence required in Loppiano (Italy) during UWW, at your own expense.

### Main Tasks

- Coordinate live streaming of UWW events across multiple platforms.
- Manage technical aspects: sound, video, and broadcast quality.
- Support the setup of hybrid (in-person + online) connections with other countries.
- Troubleshoot technical issues during rehearsals and live sessions.

### Requirements

- Proven experience in multi-platform streaming (YouTube, Facebook, Instagram, etc.)
- Familiarity with basic video/audio editing tools.
- Attention to detail, problem-solving attitude, and ability to deal with pressure
- Good communication in English, Italian, or Portuguese (extra language is a bonus).

### What We Offer

- The chance to amplify a global message of peace and fraternity through media.
- Hands-on technical experience in an international live production.
- The satisfaction of connecting people, stories, and actions across the globe.
- A certificate of participation and visibility for your technical expertise.
